	ce comments about the rected for grammatical		_	hese quotes have not	bee

- en
  - I really enjoyed this class and Dr. Shipp is always very organized and her lectures are interesting and easy to follow. She is a great teacher and I feel like I learned a lot from this class that will be beneficial in future biology courses.
  - Dr. Shipp is a wonderful professor. She truly cares about her students and wants to make sure we are learning the material. She puts topics into relatable situations, which makes lecture easier to follow. I have really enjoyed having her this semester.

- Dr. Shipp is an amazing instructor. She is very attentive and always willing to help. She takes the time on topics that can be more confusing, and always wants us to be comfortable with the information and really wants us to do our best.
- Extremely helpful and well-prepared. Great speaker, knows material very well. One of the best professors I have had at USD. Very thorough in explanations and study guides, which are a huge help; not many other professors give helpful study guides. Would highly recommend Shipp to other students and would love to take another course with her.
- Professor Shipp is very knowledgeable about all the topics discussed in class and is always willing and able to answer questions both in class and in office hours. She presented the class material in an engaging way that made it much easier to understand.
- Very knowledgeable, willing to help, wants students to succeed. Made concepts easy to understand. Really enjoyed having her as a teacher.
- Dr. Shipp is a great professor, she is nice, caring and intelligent. I was going through some personal problems and she took the time to ask me what was going on because it was affecting my performance. I am glad to of had her as a professor.
- I love her and the course was cool too!
- Professor Shipp was a great biology professor. She kept us focused on the material
  and explained it in a way that was very easy to understand/follow. The tests were too
  long and made it difficult to do as well, but overall I am very happy with the amount of
  material I learned from Professor Shipp.
- Dr. Shipp is absolutely amazing. She is very clear about her expectations and is always willing to answer questions and help clarify any misconceptions.
- I wish there were more points available for the class. The material was interesting, but hard to understand at times especially if we were moving quickly. She is a great teacher and knows how to connect with her students. I think the overall curriculum of the course tries to fit too much in. But she was great to have, I got lucky!
- Lots of knowledge on the field (still a scientist not just a professor). Really insightful in how to teach the students but has to rely less in powerpoint presentations. Willing to go the extra mile reviewing for exams. Best bio professor ever.

10. Overall,	I rate this	course as:
--------------	-------------	------------

outstanding above average average below average poor 25% (3) 75% (9)

#### 11. Overall, I rate this instructor as:
