- 9. Make comments about the instructor and the course. [These quotes have not been corrected for grammatical or spelling errors.]
  - She was very helpful and helped me to feel more comfortable asking questions. She creates a safe learning environment by assuring students it's okay to make mistakes and ask questions.

- Instructor helped me understand and write about biology. This course was fun and allowed me to practice techniques taught in lecture.
- I love this instructor! She is very personable and encourages students to solve their own questions with critical thinking. She accepts all perspectives on topics reviewed with valid reasoning.
- Dr. Shipp is super awesome, but a hard grader. This course itself is just really demanding for only 1 credit.
- Dr. Shipp was a very open-minded and flexible instructor. She is passionate about helping her students exceed.
- Dr. Shipp is great, however this course is terrible. The time demands are unrealistic (8-10 h) for a 1-credit course. This course has caused me to do poorly in other courses simply because work for this class takes up all my time.
- She is very helpful. The course is difficult and too time consuming for 1 credit.
- The instructor demonstrated knowledge in the field and was approachable and nice. However, I feel that she expected more from us coming in than we were prepared for as this is a lower division lab and most of us haven't written reports before this.
- The workload was really demanding, but that is expected of the course. There were no examples of how the reports are supposed to be and so formatting was a challenge.
- In comparison to other courses I believe the work load for this class was too demanding.
- The amount of work done outside this class in preparation for a 4 hour lab each week is ridiculously high for a 1 credit course. I ended up stressing more in lab over the actual class and am still expecting a lower grade.
- Very organized, clear, hard but growed a lot throughout course.
- (No comments entered)
- Office hours were very unrealistic for people with class from 8-10 am on Mondays. Could never get help if needed. Wish we had gotten a sample report so I didn't have to fail to then be successful because all of this is new to most of us. Loved you as a person!!!
- I feel frustrated taking this lab because I understand everything but I cannot get a decent grade on my lab reports. She is a hard grader but is helpful in office hours when I don't understand things.
- Grades too hard and expects too much out of assignments

- She gives good instructions in lab. Friendly and wants students to do well but she takes a long time to give us back the lab report so I don't know where I need to improve.
- Dr. Shipp was super knowledgeable. She expected a lot out of us from the get-go which made this course start out a little rough. I don't think she realized what caliber our writing was at because she graded extremely hard.
- Very hard grading for early undergrad lab. Was very helpful in the class and tried to make class enjoyable.
- Professor Shipp is a very intelligle scientist; she's just a <u>very</u> tough grader on lab reports and doesn't grade things on time so I wouldn't know what to improve on lab reports.
- The instructor was outstanding. She had high expectations, but was always willing to help. Peer-review editing was super helpful and she always gave the needed materials to succeed. The course overall is TOO DEMANDING. The course is one credit, but took more time and effort than the lecture itself. The lab reports every week asked for too much. A suggestion is to have the lab and lecture professors communicate because we were expected to know a lot of material in lab that we hadn't gone over in lecture yet.

.

The course is one credit, but took more time and effort than the lecture itself. The lab reports every week asked for too Much.

A Suggestion is to have the lab and lecture professors communicate because we were expected to know a lox of menterial in lab that we hadn 4 gone over in Lecture get.
